## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-51 and 57-59, drawn to an **exposure apparatus** exposing an image onto a substrate through a **liquid** and having a **liquid-repellent member** to prevent a liquid from remaining in an exposure apparatus.

Group II, claim(s) 52-56, drawn to an optical part having a water-repellant film.

3. The inventions listed as Groups I do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The "special technical feature" of claims 1-51 and 57-59 is to prevent a liquid from remaining in an exposure device. On the other hand, the "special technical feature" of claims 52-56 relates to a structure of a common optical component. Since there is no technical relationship between these inventions involving one or more the same corresponding special technical features, the inventions are not so linked as to form a single general inventive concept.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 2851

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

It is noted that this restriction is very similar to the Observation of a Lack of Unity in the International Search Report in the WIPO Publication filed by Applicant on 6/1/06.
